BIZ,
INC.

MORE UNCANNY X-MEN™ ACTION FIGURES

COMING YOUR WAY FROM TOY BIZ!

The X-MEN™ are the most popular comic Super Heroes in the U.S. and their popularity has made it's way to the toy world as Toy Biz expands their line of action figures for 1993.

Straight from the pages of Marvel Comics and the new hit FOX-TV, Saturday morning, animated series are the X-MEN, a group mutants born with super human abilities. They are outcasts from society. But their ally and mentor, Professor X helps them protect the world from the evil mutants who abuse their powers.

All 20, new 5" action figures feature their own unique super power and come complete with an official Marvel Universe Trading Card.

WOLVERINE™ -- A twist action knife-thrust, pivoting mask, and 6 different custom made knives prove Wolverine was once the deadliest of secret agents!

BISHOP™ -- Bishop's signature is his casual gun-on-the-shoulder stance, but a flick of the switch whips his weapon into firing position! A second plasma rifle makes the X-Man from the future every bit as lethal as his fellow X-MEN of the present.

STRONG GUY™ -- The brawn in X-Factor draws fans with his charms and wipes out Super-Villains with his twist action power-punch!

APOCALYPSE™ -- This meta-human maniac can alter his shape! Two cyberware weapon arms replace both standard ones with working pincers and a jab-action blade.

TUSK™ -- This 2-for-1 member of Apocalypse's Dark Riders carries his own back-up! Operate the recessed life mechanism and the ugly mutant spawns a 2 1/2-inch tall Tusk clone!

GAUNTLET™ -- Among the Dark Riders, Gauntlet always holds the advantage in firepower: spin-action gatling-gun hands!

OMEGA RED™ -- Wolverine's battles with this super-soldier date back 30 years! But with his stab-action carbonadium tendril-spike and tendril-whip, this fight's entering its final round!
